1. New features, modifications and history

## 1. New Features, Modifications and History

### LANCOM Advanced VoIP Client modifications from 1.00.0174 -> 1.10.0380

#### New Features:

- Support for NETeasyPhone Headsets
- Support for Plantronics Voyager 510-USB
- Implementation of additional compression options
- New LANCOM skin
- Manual start of SIP registration
- Configuration option "own location"
- Configuration option "automatic public exchange access"

#### Corrections/modifications:

- The opaque parameter in Register packets will be considered
- A new registration will be effected if the initial registration was faulty or the connection was lost
- Call hold / consultation hold / connect now works in all directions
- Corrections on sending DTMF characters
- \* and # will now be handled as digits (internal calls via LANCOM devices)
- NUMLOCK is no longer activated by default
