Table of contents

1.   Introduction

LANCOM Systems CAPI Faxmodem is a COM-port driver that emulates a serial modem provided for free. CAPI Faxmodem needs LANCAPI as an interface to connect to a LANCOM router. Fax programs like Windows fax service can use CAPI Faxmodem to send and receive fax documents to/from the ISDN.

2.   Comments

A respective version of CAPI Faxmodem is necessary for 32 and 64 bits versions of Microsoft operating systems. Versions with the extension "x64" are for 64 bits operating systems, such with the extension "x86" are for 32 bits operating systems.

3.   Known Issues

LANCAPI in common
CAPI Faxmodem is limited to one channel for sending and receiving fax documents at a time.

CAPI Faxmodem x64 (Version for 64 Bits Operating Systems)
CAPI Faxmodem x64 is not feasible for systems with Intel Itanium and 64 bits operating system (IA64).

Latest support notes and known issues regarding the current version can be found in the download area of our website http://www.lancom-systems.eu/Common-Support-Hints.64.0.html
