Table of Contents

1.   Preface

LANCOM Systems LANCAPI is a specific implementation of the common CAPI programming interface, compliant to CAPI 2.0, by LANCOM Systems. It is provided for free for all LANCOM routers with ISDN ports. ISDN functions can be used at any workplace with no need for additional hardware. Additional equipment like ISDN cards or hardware modems for each workplace becomes superfluous. Only the software for office communication has to be installed on each PC.

Note

LANCOM LANCAPI supports Windows Vista, Windows 7, Windows 8, Windows 8.1, Small Business Server 2008, Small Business Server 2011, Windows Server 2008, Windows Server 2008 R2, Home Server 2011, Windows Server 2012, Windows Server 2012 R2 (all 32- und 64-Bit Versions).

2.   Comments

A respective version of LANCAPI is necessary for 32 and 64 bits versions of Microsoft operating systems. Versions with the extension ‚x64' are for 64 bits operating systems, such with the extension ‚x86' are for 32 bits operating systems.

3.   Known Issues

LANCAPI in common
Currently, LANCAPI does not support the ISDN supplementary services ECT (Explicit Call Transfer), CD (Call Deflection), Redirected Number and DTMF detection or generation.

LANCAPI x64 (Version for 64 bits operating systems)
LANCAPI x64 does not support systems with Intel Itanium and 64 bits operating system (IA64).

Latest support notes and known issues regarding the current version can be found in the download area of our website http://www.lancom-systems.eu/Common-Support-Hints.64.0.html

4. New Features, Changes and History

LANCOM LANCAPI changes 9.00.0002 RC1 (x86)
LANCOM LANCAPI changes 9.00.0002 RC1 (x64)

New Features:

■ Various fixes of occurring blue screens
■ Initial support of Windows 8, 8.1, Windows Server 2012 and Windows Server 2012 R2
