02 **1. Preface**

03 **2. New features, improvements, and history**
03 LANconfig 11.00.0018 RC1 / LANmonitor 11.00.0001 RC1

04 **3. Important advice**
04 Disclaimer

1. Preface

The LANtools are a comprehensive set of free management & monitoring tools for a detailed configuration and monitoring of R&S®LANCOM devices.

This document describes the innovations within LANtools version 11.00 RC1, as well as the improvements since the previous version.

Note
LANtools support the Microsoft operating systems Windows 10, Windows 11, Windows Server 2016, Windows Server 2019, Windows Server 2022, and Windows Server 2025.

For Windows Vista and Windows 2008 Server you will find user data under \Users\USER\AppData\Roaming\LANCOM\ and the application files under \ProgramData\LANCOM\.

When upgrading to LANtools 8.50 or newer, all existing user- and application data is moved to the corresponding folders.

2. New features, improvements, and history

LANconfig 11.00.0018 RC1 / LANmonitor 11.00.0001 RC1

New Features

- Support for LCOS 11.00
- Discontinuation of Wireless ePaper Management

Bug fixes

LANconfig

- In LANconfig, ETH ports can be selected when configuring WWAN bridge mode. If a suggested default value, such as ‚ETH 1', was selected here, LANconfig displayed an error message. As a result, the configuration could not be completed as desired.
- After an LCOS firmware update, the affected device might have been rejected in LANconfig with the message "Incorrect login credentials."
- In the firewall configuration, existing WireGuard connections could not be selected as remote endpoints.

3. Important advice
