## WWAN module EM060K-EA R01A05

### Table of contents

02	<b>1. Preface</b>
02	<b>2. Backing up the current configuration</b>
03	<b>3. New features, modifications, and history</b>
03	WWAN module firmware improvements R01A05
04	<b>4. General advice</b>

## 1. Preface

In the context of the hardware given by the products the at a time latest WWAN module firmware is available for all LANCOM products with appropriate WWAN module and is available free of charge for download from LANCOM Systems.

This document describes the innovations within the WWAN module EM060K-EA software release R01A05, as well as the improvements since the previous release.

Before upgrading the firmware, please pay close attention to chapter 3 "General advice" of this document.

## 2. Backing up the current configuration

Please install the latest LANtools version first.

Before upgrading your LANCOM devices to a new WWAN firmware version it is essential to backup the configuration data!

After that you can use LANconfig to load the latest LCOS-version into the device.

Due to extensive features it is not possible to downgrade to a previous firmware without using the backup configuration.

If you want to upgrade devices which are only accessible via router connections or Wi-Fi bridges, please keep in mind to upgrade the remote device first and the local device afterwards.

We strongly recommend updating productive systems only after internal tests in client environment. Despite intense internal and external quality assurance procedures possibly not all risks can be eliminated by LANCOM Systems.

### 3. New features, modifications, and history

#### **WWAN module firmware improvements R01A05**

##### **Bugfixes / improvements**

→ General functional and stability improvements

## 4. General advice
