#### **1. Introduction**

This area contains current **Lancom Operating System** (short: LCOS)-versions and information about your **T-Systems Business LAN R800V** Router.

If you like to update your device, please install the current LANtools-version first. After that, start LANconfig and with the button „Firmware-Upload“ you are able to upload the new LCOS-version into your device.

**There may be several files in your device's directory:**

- **latest firmware version**
- **previous firmware version**
- **firmware for use with router options**
- **different firmware files for Annex A /Annex B devices**
- **converter firmware**
- **manuals / description files**

**Please note that not all above mentioned files may exist for each device. There may furthermore be different combinations of the above mentioned files available on FTP, WEB or CD.**

**Normally you will find the latest files on our FTP- or webserver. Please pay also attention to the chapter “Available files” in this document.**

Revision information of earlier LCOS-versions is recorded in the Release Notes, which you will find in the “Documentation” area (filename: LCOS-xxx.PDF, whereas xxx stands for the LCOS version number).

## 2. Available files

This area contains the following files (xxx is equal to the LCOS version number):

Readme-R800V.pdf	this file
